The Oriental Institute, part of the University of Chicago, is a world-renowned center for research, focused on the study of the ancient Middle East. Our museum houses a major collection of antiquities from ancient Egypt, Iran, Iraq, Israel/Palestine, Nubia, Syria, and Turkey, mainly dating from between 10,000 BC and 650 AD. These lands were called the “Orient” at the turn of the last century when University of Chicago archaeologists began unearthing many of the artifacts now on view in the museum.
