PREFACE

This catalog is intended to be only a checklist of the Brooklyn Museum's collection of Demotic Egyptian texts. The assignment given the compiler was to provide both the museum and Demoticists generally with a list of all the pieces plus only such information as would make the list useful. It was not intended to be a complete publication of the texts with the usual transliteration, translation, notes, and photographs or drawings.

Such an assignment obviously presents certain problems. The purpose, of course, is to provide a summary of the salient facts about a text so that a Demoticist anywhere may be able to determine whether a given document is relevant to his investigations and warrants the obtaining of a photograph for his own study. However, the cataloger, since he cannot choose only those texts which he can read with some assurance and completeness, often finds it difficult, if not impossible, to extract the significant information he wishes from a poorly preserved or fragmentary text. Frequently only long, detailed study can elicit a clue to the nature of a text, and then often only as a result of fortunate, even fortuitous, association with a text or texts already published. The desire to publish the list as expeditiously as possible conflicts with the conviction that still longer pondering over a recalcitrant ostrakon, for example, and much thumbing through the now voluminous publications of Demotic ostraca might possibly result in an understanding of it.

This checklist is, therefore, necessarily uneven in the amount and kind of information provided from item to item, and the compiler is painfully aware of the fact. However, every piece is included even though it is of apparently negligible significance or I can make little of it. It should be noted that a good many texts that are large, well preserved, or unusual in one way or another have already been published, some of them even before they became the property of the Brooklyn Museum. They are, of course, listed in their proper place with pertinent bibliography.

The compiling of the catalog was begun when I spent six weeks in July and August 1966 as the Wilbour Fellow at the museum going over the entire Demotic collection, examining it piece by piece. At that time I took notes on the physical nature of each piece, occasionally rearranging wrongly mounted pieces of papyrus or fitting together pieces of broken ostraca, and reading such texts as proved amenable to limited study. Later, Bernard V. Bothmer, Curator of Egyptian and Classical Art of the Brooklyn Museum and his staff supplied me with photographs of all the unpublished pieces, even including sundry collections of unmounted, frequently unrelated, fragments of papyrus (cat. nos. 30–56 and 211–212) still in boxes as received by the museum. The task of photographing was a large one because most of the collection had not previously been photographed.

The sixty-three objects shown on the forty plates in this catalog were selected for various reasons, generally either because I could read the text and something about it seemed unusual and significant or because I could not read the text, although it is reasonably well preserved, and I judged that others should have the opportunity to see it.

The Brooklyn collection of Demotic texts derives from various sources, but by far the major portion of it was gathered by Charles Edwin Wilbour in Egypt between the years 1887 and 1896. Wilbour recorded his acquisitions and other finds in notebooks* similar to day journals. The museum did not receive Wilbour's collection all at one time, as indicated below, but in parts in the years 1916 (the major portion), 1935, and 1947.

Wilbour frequently, but by no means always, further marked his ostraca in pencil or ink, usually on the reverse side, with the place and date of acquisition in an abbreviated form. These marks are of the following nature:

E 1 '90 means "Elephantine 1890," the meaning of the "E" being assured by internal evidence in some of the texts. There are also **E 4 '90** and **E 5 '90**, but the significance of the medial numeral is unknown.

Gebelayn '96 means obviously "Gebelên 1896."

K '87 means "Karnak 1887," the significance of the "K" being determined by the Theban character of a number of the texts so marked.

* The Wilbour notebooks referred to by Hughes are usually cited as such. Sixteen in number, the notebooks date from 1880 to 1894 and contain entries for each day of Charles Edwin Wilbour's travels during his journeys in Egypt. The entries contain written comments, sometimes in shorthand, and small sketches. Some idea of what these notebooks contain can be obtained by looking at the chronologically arranged publication of Wilbour's letters in Jean Capart, *Travels in Egypt, December 1880 to May 1891: Letters of Charles Edwin Wilbour* (Brooklyn: The Brooklyn Museum, 1936). Other Wilbour material in the Brooklyn Museum includes drawings, squeezes, and annotations on the plates of a number of books in the museum's Wilbour Library of Egyptology (R. Fazzini, 2004).

Q 87 means “Qurnah 1887.” The year number is always written inside a large Q. That the “Q” stands for Qurnah, the Theban necropolis, is indicated by, for example, the name of the well-known Theban banker, Kephalos son of Epikrates, in the reigns of Augustus and Tiberius, who signed a receipt (cat. no. 110) that Wilbour numbered **12768 1720** and marked “Q 87.”

The number **12768** is part of the Brooklyn Museum’s original accession numbering system and represents the entire lot of the Wilbour material that came into the museum in 1916. The numbers that follow **12768** are the individual identification numbers for each object. While many of the Wilbour objects from lot **12768** have received new museum accession numbers beginning with **16.**, many others have not, including most of the ostraca from that part of the collection. One ostrakon (cat. no. 105) bears the number **12768** but nothing more; one wooden piece (cat. no. 6) is numbered **12768 440**; one ostrakon (cat. no. 92) is marked **12768 1403**; and all the rest, all ostraca, are numbered from **12768 1550** to **12768 1864**, although by no means every number between those limits is represented in the Brooklyn collection. Also, in the collection are twenty-eight ostraca that bear no modern identification whatsoever but are undoubtedly part of Wilbour’s collection as proven by cat. no. 128, which bears his notation **Q 87** on its back. These ostraca have been given Brooklyn Museum accession numbers **16.580.232** to **16.580.259**.

The Brooklyn Museum accession numbers indicate the year of acquisition of a piece by the first two digits, **16.**, **34.**, etc. Specifically, numbers prefaced by **16.** indicate that the objects were gifts of the estate of Charles Edwin Wilbour in 1916. Those prefaced by **35.** were a gift from his daughter, Theodora Wilbour, in 1935 and were originally acquired by her father. Those papyri numbers prefaced by **47.218.** were a bequest of Theodora Wilbour in 1947 and also derived from the estate of her father.

In 1937 the Brooklyn Museum acquired the Demotic papyri and ostraca of the New York Historical Society (NYHS). That collection consisted of three separate private collections, and the NYHS numbers are given in the catalog along with the Brooklyn accession numbers because some of the texts were published before 1937 under the NYHS numbers. The NYHS numbers also indicate to which of the private collections the object originally belonged as follows:

NYHS A - - - : From the collection of Dr. Henry Abbott, which was gathered in Egypt between 1832 and 1852.

NYHS An O. - - - : Ostrakon from the collection of Henry J. Anderson.

NYHS S - - - : From the collection of Edwin Smith.

The making of this catalog was urged upon me by Mr. Bothmer for some time before I agreed to undertake it. Not long after I began it, heavy administrative duties devolved upon me and uninterrupted work on the texts became impossible, thus accounting for a large part of the ten years that completion of it has taken. The patience of Mr. Bothmer has been taxed, but his generosity and willingness to provide me with all possible facilities and assistance have never flagged since my residence in Brooklyn in 1966. His staff, some members of which have moved on in the meantime, also made me a special object of their concern and helpfulness during my stay at the museum. To all of them and to those persons whose help with certain texts is acknowledged in the catalog I give my sincerest thanks.

After the completed manuscript had been submitted in 1976, Prof.-Dr. Karl-Theodor Zauzich read it during his stay in Brooklyn in 1978 and looked carefully at the original of each text listed in it. He reported that he did not see eighteen of the texts appearing in the catalog under cat. nos. 6, 30, 32, 34–43, 46, 56, 92, 118, and 145. However, he reported seeing sixteen items that did not appear in the catalog, and he provided the following designations:

1. Ostraca with the Wilbour prefatory number **12768** and serial numbers **1627**, **1631**, **1634**, **1638**, **1667**, and one with the Brooklyn Museum accession number **16.589**.
2. Collections of fragments of Demotic papyri bearing Brooklyn Museum nos. **35.225**, **47.218.7**, **47.218.29C**, **47.218.63** (this number, I believe, consists of fragments bearing hieratic and I have not included it), **47.218.84C**, **47.218.112**, **47.218.134** (this number occurs twice on Zauzich’s list, but one of the occurrences may be an error for one of the four numbers 135 to 138), **47.218.139**, and **47.218.147**.
3. Two small unmarked boxes containing fragments of Demotic papyri. These may be among those now included as cat. nos. 211 to 212 in the Addenda.

Upon my request for photographs of the above items which Zauzich had seen, but which I had not, the museum was able to find and photograph only six of the sixteen; they now appear in the catalog as cat. nos. 32, 173, 175, 195, and 206. The sixth, **47.218.63**, was not used for the reason given above. At the same time the museum sent me photographs of the ostraca that now appear in the catalog as cat. nos. 205, 207, 208, 209, and 210, but neither Zauzich nor I ever saw them.

In adding to the catalog those texts found after completion of the manuscript, I have been able to substitute four of them for other separately listed ostraca that now appear as cat. nos. 32, 173, 175, and 195. The remaining texts have simply been appended at the end of the catalog as cat. nos. 205 to 212 without any attempt to insert them in the various categories into which the original catalog was divided. Also, no attempt has been made to include the physical description of an object. However, data from such added texts have been inserted in the pertinent indices and concordances.

A couple of years after the first completion of this catalog, W. Brunsch published in *MDAIK* 34 (1978: 29–31) a line of Demotic on a censer (*Räucherarm*) in the Brooklyn Museum from a photograph supplied by the museum. I have not seen the object and no accession number or other means of identification is given in Brunsch's article.

I am greatly indebted to Prof.-Dr. Zauzich for numerous improvements upon and additions to my manuscript — many more than I have been able to indicate.

My sincere thanks are due to Robert S. Bianchi and Ogden Goelet of the museum for their unfailing patience and willingness to help me with the often troublesome problems in the final stages of my task. Goelet labored painstakingly to prepare the manuscript for printing.

FOREWORD

George R. Hughes' preface provides background on the Demotic materials in the Brooklyn Museum and for the project to prepare a catalog of them. Since the April 1985 date of his preface, Ogden Goelet entered the entire manuscript into the computer, taking great care with format and transliteration, and Paul F. O'Rourke prepared photographs of all the items to be included in the plates. Much "tweaking" of the manuscript and preparation of the plates remained to be done, but both Goelet and O'Rourke had to move on to other projects. Several unsuccessful attempts were made between 1985 and Hughes' death in 1992 to find funding for this publication. Subsequently, discussions were held between the undersigned in an attempt to identify ways to bring this catalog into print. The solution, unusual but not unprecedented, was to have the Brooklyn catalog published through the Oriental Institute Publications Office. It is appropriate that the Oriental Institute can, in this way, help bring to print the final major unpublished manuscript of a scholar who served on its faculty for thirty years, fifteen as Field Director of its Epigraphic Survey and four as Director of the Oriental Institute itself.

The undersigned express their deep appreciation to Arnold L. Lehman, Director of the Brooklyn Museum, and Gene B. Gragg, former Director of the Oriental Institute, for their support of this project; to Goelet and O'Rourke for their initial work on the manuscript; and to Thomas G. Urban of the Oriental Institute Publications Office for completing the volume and guiding it to print. In the years since Goelet prepared the electronic version of the manuscript, Brian P. Muhs and Steve Vinson have also had the opportunity to examine texts in the Brooklyn collection. Both Muhs and Vinson agreed to share their notes, which have been included in such a way that the original integrity of Hughes' manuscript is preserved. Muhs adds comments to cat. nos. 14, 20–22, 73–87, 89, 99–100, 103, 105, 115, 180, 186, and 196; and Vinson adds comments to cat. no. 24 and a catalog entry (cat. no. 213) for papyrus fragments that were found in the unrolling of a cartonnage mummy.

It is our pleasure that finally, almost forty years after Hughes began his study of the Brooklyn Demotic materials, scholars around the world are able to acquaint themselves with that important collection and profit from the enormous scholarship and insight reflected in the work of George R. Hughes.

4. MEMORANDUM

<i>Museum Number:</i>	16.651	<i>Illustration:</i>	—
<i>Provenience:</i>	Edfu(?)	<i>Date:</i>	Year 29 (of Augustus)
<i>Dimensions:</i>	Length 13.9 cm; width 4.5 cm; thickness 0.9 cm		

DESCRIPTION

Shaped like a mummy label but without a hole in the rounded end. The wood has darkened and the ink has flaked off the slightly rough wood so that the inscription is difficult to see.

TEXT

1. Year 29, Paophi 23. Has paid (*r.wt*) *Pꜣ*- ...
2. son of ... of poll (*n ꜥpe.t*),
3. 2 *staters*.

<i>Provenience:</i>	Akhmîm(?)	<i>Date:</i>	—
<i>Dimensions:</i>	Length 28.8 cm; width 10.4 cm; thickness 1.4 cm		

DESCRIPTION

Rectangular with five bored holes, two at each end and one in the middle, the middle one still containing a plug which the others also contained when the text was written. The text is in short lines crosswise the board in one column of twenty-two lines and a second of twelve lines.

TEXT

A list of days from I *šmw* 27 to 29, II *šmw* 1 to 21 (omitting days 4 and 5), and IV *šmw* 1 to 10, followed in nearly every case by one or both of just two names, *Pꜣ-di-Mn* and *Pꜣ-di-Wsir*. For II *šmw* 13 to 21 and IV *šmw* 1 and 9, the names are followed by the word *ḳrndꜣ*, IV *šmw* 5 is labeled “blank” (*wš*), and IV *šmw* 10 is labeled just *ḳrndꜣ*. *Ḳrndꜣ*, with the god determinative, is presumably the name of the deity Kollanthes of Akhmîm (Erichsen, *Dem. Glossar*, 567 s.v. *klnd*), but why is not apparent.

6. MEMORANDUM

Museum Number: 12768 440*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* Length 9.3 cm; width 2.2 cm; thickness 0.7 cm

DESCRIPTION

Only a sliver with a bored hole in the middle of its present dimensions. On one side are the first letters of three lines of Greek above and the mere ends of four lines of Demotic below. On the other side are only the very ends of four lines of Greek.

7. MEMORANDUM

Museum Number: 16.650*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* Length 18.3 cm; width 5.8 cm

DESCRIPTION

A very rough piece of board broken across the vertical middle, the pieces are now glued together.

The text consists of a list of sixteen male personal names on the obverse and seven on the reverse. Most of those on the reverse are difficult to make out. Beneath those on the reverse are a few undecipherable marks as though of a summation.

INSCRIBED STONE PIECES (Cat. Nos. 8–10)

8. INSCRIBED STONE

<i>Museum Number:</i>	34.1192	<i>Illustration:</i>	Plate 3
<i>Provenience:</i>	—	<i>Date:</i>	—
<i>Dimensions:</i>	Height 16.5 cm; width 6.5 cm at top, 10.0 cm at bottom; thickness 1.5 cm		

DESCRIPTION

The corner of a very carefully polished calcite slab of which the two original edges and the corner are neatly rounded. Both faces are carefully marked off into perfect squares with incised lines. One side has large squares, 3.8×3.8 cm; the other has small squares, 0.95×0.95 cm, that is, one-sixteenth the size of the large squares. The Demotic text, seventeen lines on each face, has no relation to the squares, but is an account consisting largely of male personal names followed by sums of money ranging from 1 *obol* to 2 *kite*. Some readable notations in the text that are not simply personal names are given below.

TEXT

Obverse

2. *Pꜣ-di-Nfr-ḥtp*, the builder of the *ḏr*.
8. Account of the phyles.
16. ... the scribes of Pharaoh.
17. (This line appears to be the same as line 1 but without the sum of money.)

Reverse

4. *Pꜣ-di-Nfr-ḥtp* son of *Pꜣ-di-Hnsw* (also appears in obverse line 13).
12. Agent of Pharaoh.

9. INSCRIBED STONE

<i>Museum Number:</i>	37.1821E = NYHS S 278	<i>Illustration:</i>	—
<i>Provenience:</i>	Thebes	<i>Date:</i>	Year 20 of Ptolemy II Philadelphus
<i>Dimensions:</i>	Height 25.9 cm; width 10.7 cm at top, 23.7 cm at bottom; max. thickness ca. 3.0 cm		

DESCRIPTION

A limestone slab, trapezoidal in shape, with the writing surface well smoothed. Demotic text of twenty-one lines on one side only. The petition of a blind porter at Karnak to Amun under various names or manifestations for restoration of his sight.

TEXT

Lines 2–3: This document is one of ten Demotic documents known to me in which Ptolemy II Philadelphus is associated in years 19 to 26 of his reign “with Ptolemy, his son.” The ten are:

Year 19: Pap. Louvre 2424 (pp. 17–21)

Year 20: Cat. no. 9 (Brooklyn 37.1821E)

Year 21: Pap. Brit. Museum 10026 (Carol A. R. Andrews, *Catalogue of Demotic Papyri in the British Museum*, Volume 4: *Ptolemaic Legal Texts from the Theban Area* [London: British Museum Publications, 1990], pp. 16–22; Pap. Hauswaldt 1 [pp. 1–3], 10 [pp. 33–39]; Pap. Philadelphia 14 [pp. 61–64, pl. 14]).

Year 23: Cat. no. 62 (Brooklyn 37.1856E)

Year 24: Cat. no. 63 (Brooklyn 37.1861E); Mattha, *Dem. Os.*, no. 88

Year 26: Pap. Philadelphia 15, pp. 65–69, pls. 20–21

Line 5: The name of the father of Berenike, the canephore, is clearly *ꜣtyrstꜣws*.

Lines 11–15: The blind porter prayed before Amun under five different names or manifestations thus: “Before Amun of the Court, before Amun-Re King of the Gods, Amun King of the Two Lands, the Shu great of shining in Thebes (*Wꜣs.t*), (and) Amun Primeval One of the Two Lands (*pꜣyꜣw tꜣ.wy* for *pꜣwty tꜣ.wy*), the divine master (*pꜣ ḥry ntr*). Return to me, O my great Lord (*pꜣyꜣy nb ꜣꜣ*). O Amun, I am defenseless. I am thy servant; let me not perish; do not forget me!”

<i>Provenience:</i>	Memphis	<i>Date:</i>	Year 23 of Ptolemy (III Euergetes I?)
<i>Dimensions:</i>	Height 11.8 cm; max. width 8.2 cm; max. thickness 1.1 cm		

DESCRIPTION

A round-topped limestone stela inscribed in ink. The text consists of fourteen lines on each face of the stela. Those on the obverse are nearly completely preserved, but those on the reverse are badly rubbed.

TEXT

Obverse

1. He who does [...] for *P3-šr-p3-mwt*,
2. it is for Ptah that he does ... [...].
3. Thoth, the great god, Osiris-Onnophris, *M3-ḥrw-R* (Amenemhêt IV?),

14. whose mother is *Ni.t-wnt*, in year 23, Choiak, of Pharaoh Ptolemy.^j

Reverse: Lines 1–3 are almost wholly illegible. Lines 4–8 are sufficiently preserved to show that they are the exact duplicate of lines 3–6 on the obverse. The remaining lines appear to read thus:

9. [O gods(?)] who are written on the stela, do good to^c him who does
10. [good] to *P3-šr-p3-mwt*, [do] evil to him who does evil
11. [to *P3-šr-p3-mwt* ... those who are alive and those who are dead, all of them,
12. because (? *hpr*) he is a servant of Thoth, he is a servant of Osiris-Onnophris, he is a servant of Isis, [he is] a servant of Neith.
13. [Written by] the trustworthy servantⁱ *P3-šr-p3-mwt* son of *P3-kme*, whose mother is *Ni.t-wnt*,

DEMOTIC (Cat. Nos. 13–56)

PETITIONS AND MEMORANDA (Cat. Nos. 13–16)

13. PAPYRUS

<i>Museum Number:</i>	35.659	<i>Illustration:</i>	Plates 8–9
<i>Provenience:</i>	Fayum(?)	<i>Date:</i>	Year 26 (of Amasis or Darius I?)
<i>Dimensions:</i>	Max. height 19.0 cm; max. width 26.5 cm		

DESCRIPTION

Light brown papyrus, almost white in strips, broken and tattered. The papyrus was turned over top to bottom, but the relationship of the text on the obverse to that on the reverse is obscure.

TEXT

Obverse (written across fibers): Nine lines beginning with an epistolary greeting to Ptah:

“[Plea of the servant ...] before Ptah: O may Prê cause that his duration be long,” and ending with the date, “Year 26, Phamenoth(?)”.

Reverse (written parallel to fibers): Nine lines beginning:

1. *‘nh-Ḥp*, this man of *Pn(?)*-*t3-ḥny*, he is in *T3-ḥny* since [...],
2. he being held responsible for them (*iw= w ip irm= f*). He did not come (or “go”) south. I greeted him in *Pr-mḏ* (Oxyrhynchus?).

Only bits can be made out in the remainder.

14. PAPYRUS

<i>Provenience:</i>	Thebes(?)	<i>Date:</i>	Year 53 (of Ptolemy VIII Euergetes II) ^A
<i>Dimensions:</i>	Height 8.8 cm; width 6.9 cm		

DESCRIPTION

The middle-sized piece of three separate pieces mounted together under the same accession number. The other pieces are cat. nos. 15 and 27. The text of six lines, on the side with vertical fibers, is complete.

The papyrus was turned over top to bottom for the one-line address on the reverse.

NOTES — Brian P. Muhs

^A Muhs suggests reading “Year 23 (of Ptolemy III Euergetes I).”

^B Muhs suggests the reading *ḥ3.t-sp 23.t* (with the *.t* under the sign for 20) “Year 23.” A like-named scribe, *M3y-rsy* son of *P3-dī-wsir*, is attested on burial tax receipts OIM 19333 (Brian P. Muhs, *Tax Receipts, Taxpayers, and Taxes in Early Ptolemaic Thebes* [Oriental Institute Publications 126; Chicago: The Oriental Institute, 2005], cat. no. 40);

O. TT 373 doc. 2367 (Sven P. Vleeming, *Ostraka Varia: Tax Receipts and Legal Documents on Demotic, Greek, and Greek-Demotic Ostraka, Chiefly of the Early Ptolemaic Period, from Various Collections* [Papyrologica Lugduno-Batava 26; Leiden: E. J. Brill, 1994], no. 55); and O. Birbeh 3 (Didier Devauchelle, “Ostraca démotiques de Birbeh,” *Bulletin de l’Institut français d’archéologie orientale* 98 [1998]: 143–44, 149). O. Birbeh 3 is dated to a year 24, almost certainly of Ptolemy III Euergetes I. The fact that this papyrus also concerns the burial tax (*ḥd n mr ḥꜣs.t* “the fee of the necropolis overseer”) renders the identification of the scribes plausible and favors dating this papyrus to the reign of Ptolemy III Euergetes I.

<i>Provenience:</i>	—	<i>Date:</i>	Roman
<i>Dimensions:</i>	Height 23.7 cm; width 12.9 cm		

DESCRIPTION

Both pieces, upper and lower, are of a distinctive pale yellow papyrus. The pieces were separately numbered and mounted, but on the basis of the color and the fibers of the papyrus as well as the similarity of the text on both pieces I decided that they were originally one piece and should be mounted together. This decision appears to be confirmed by the one-line notation on the back, which seems to be continuous from one end to the other, even across the break between the pieces, although interrupted by two blank spaces which are perhaps due to folds of the rolled papyrus. It must be noted, however, that Text *a* (on 37.1797E) is complete in itself and in a different hand from Text *b* (on 37.1798E) and that the beginning (on 37.1797E) of the line on the reverse is similarly in a different hand from the end (on 37.1798E). I do not know how to reconcile these discordant facts except to note that neither Text *a* nor *b* contains, as others do, the name of the deceased and that both may be practice exercises or *aides-mémoire*. In fact, Text *b* does not, insofar as I can make it out, appear to be a continuous, coherent text.

I wish to thank Mark J. C. Hinrichs, 1901), no. 3169 (pp. 9–13). On this genre, the *š*^c.*t n snsn* “Book of Breathing” as it was commonly called, see Spiegelberg, *Eigennamen*, 9ff.; N. J. Reich, “An Abbreviated Demotic Book of the Dead,” *JEA* 17 (1931): 85–97; and G. Botti, “Il Libro del Respirare e un suo Nuovo Esemplare nel Papiro Demotico N.766 del Museo Egizio di Turin,” *JEA* 54 (1968): 223–30. The Dresden papyrus (Spiegelberg, *Eigennamen*, 13) has a similar designation on the reverse, but it is simply *t*3 *š*^c.*t n snsn* “The Book of Breathing.”

This accession number (37.906E-C) applies to one large piece and two small pieces mounted together. At least one of the small pieces is in a different hand from the large one. When received from the NYHS, cat. nos. 23 and 26 were among seven pieces (A–G) in a neatly and tightly folded rectangular packet. The five other pieces (A, D, E, F, and G) bear Greek texts.

The pieces are badly water damaged and were crumpled when wet. Parts of ten lines remain on the obverse; sparse writing, almost illegible, remains on reverse. Part of this economic document is readable.

TEXT

Thirty-four lines of writing are preserved in the middle column; the ends and beginnings of lines of similar columns are to the right and left of it. The reverse is blank. A large water(?) stain across the text affects the visibility somewhat. A “year 8” is preserved in column II, line 3, but no sovereign’s name. Accounts, apparently a daybook of receipts (and expenditures?), are recorded. Notations include: (column II, line 5) “The receipts of this day, 204 *deben*, 4 *kite*” and (column II, line 20) “The receipts of this day, 52 *deben*, 4 *kite*.” The totals are sometimes large, for example, (column II, line 6) 430 *deben* and (column II, line 21) 361 *deben*.

25. PAPYRUS*Museum Number:* 35.1451*Illustration:* —*Provenience:* —*Date:* Late Ptolemaic/Early Roman*Dimensions:* —**DESCRIPTION**

Seven separate pieces and two small fragments, all of the same text, are mounted together, but only two pieces appear to join directly. The text is of accounts cast in columns of which parts of nine columns are preserved. One column, apparently complete, has thirty-two entries. Sample entry: “Wood, 4 *obols*.” Others are for water, resin, and other items. Nearly all the sums, probably of expenditures, are for 1, 2, 4, 6, 8, or 10 *obols*. The reverse is blank.

26. PAPYRUS*Museum Number:* 37.906E-B = NYHS A66*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* —**DESCRIPTION**

When received from the NYHS, cat. nos. 23 and 26 were among seven pieces (A–G) in a neatly and tightly folded rectangular packet. The five other pieces (A, D, E, F, and G) bear Greek texts. One large piece (height 26.5 cm) and several small ones, all tattered, are mounted together under this number (37.906E-B). Some of the fragments do not belong to the text of the largest piece, although they also are from accounts. The column on the largest piece appears to be headed “The men [...]” and consists of personal names with numbers following. The remains of eighteen lines are distinguishable on the obverse of the largest piece. One can distinguish only illegible traces on the reverse.

The largest of three pieces mounted together under the same number. The other pieces are cat. nos. 14 and 15. The text is complete in sixteen lines across the width on the obverse and ten lines on the reverse. The papyrus was turned over top to bottom and the text continued on the reverse. The text apparently consists of various alternative recipes with ingredients and amounts for preparing ointments. The ingredients include wine, beer, oil, natron, wax, dom palm (nuts?), myrrh, fresh incense, sycamore figs, and others that are unrecognizable. Some of the recipes call for 1 *hin* or 1/2 *hin* amounts, others for 1/4 *h3r*, and still others for 1/12 of an unnamed measure.

Parts of two columns of text have double vertical lines separating them. The reverse is blank. It is apparently an omen text.

<i>Dimensions:</i>	—		

DESCRIPTION

Thirteen fragments, the largest of which is 13.6×3.8 cm. Eight have Demotic on both sides, the others have it on only one side. At least four different hands are distinguishable, but little is readable inasmuch as only a word or two is preserved in any of the pieces which have from one to ten lines on them.

<i>Provenience:</i>	—	<i>Date:</i>	—
<i>Dimensions:</i>	Largest piece: height 8.0 cm; width 6.3 cm; others much smaller		

DESCRIPTION

Six fragments. Four pieces have Demotic on one side and Greek on the other; one has Greek on both sides but with Demotic personal names also on one side; the sixth has Demotic on both sides. The largest piece appears to

have personal names with sums of money in Demotic on the obverse. The reverse bears the mere ends of four lines in Greek and to the right of them the beginning of a column with the following, one below the other, in large uncials: “Mecheir, Theon — 141, Phamenoth, Pharmouthi, Pachon.” A smaller fragment has “Epeiph” in the same hand.

44. PAPYRUS

Museum Number: 47.218.29-D
Provenience: Elephantine(?)
Dimensions: —

Illustration: —
Date: —

DESCRIPTION

Fragments of papyri were removed from a box that contained a mixture of fragments bearing hieratic and Demotic writing. Most of the Demotic pieces are inscribed on both sides. The larger pieces probably belong to the same document. The texts appear to be accounts. Personal names (e.g., *Ns-pʒ-mte*) occur, similar to the names on the fragments under cat. nos. 45, 53, and 54.

45. PAPYRUS

Museum Number: 47.218.41
Provenience: Elephantine(?)
Dimensions: —

Illustration: —
Date: —

DESCRIPTION

Fragments in a box marked “Demotic Fragments.” The largest piece (6.8 × 3.7 cm) has lists of personal names on both sides (e.g., *Ns-Hr*, *Ns-pʒ-mte*) similar to the names on the largest piece under cat. no. 44 and the fragments under cat. nos. 53 and 54. The other pieces, two of which appear to belong to the large piece, are very small.

46. PAPYRUS

Museum Number: 47.218.43
Provenience: —
Dimensions: —

Illustration: —
Date: Pre-Ptolemaic and Ptolemaic

DESCRIPTION

Some sixty small fragments, most of them bearing Demotic written in several different hands. No more than a word or two is preserved on any fragment.

47. PAPYRUS

Museum Number: 47.218.44
Provenience: —
Dimensions: —

Illustration: —
Date: Ptolemaic period

DESCRIPTION

Fragments of contracts. The largest pieces apparently belong to the same document, which has a text on the reverse in a different hand from that on the obverse. Karl-Th. Zauzich suggests that two small fragments may bear Aramaic script.

48. PAPYRUS

<i>Museum Number:</i>	47.218.58-A	<i>Illustration:</i>	—
<i>Provenience:</i>	—	<i>Date:</i>	—
<i>Dimensions:</i>	—		

DESCRIPTION

These fragments, belonging to the same document, were among an assortment with scripts other than Demotic in one container marked “4 L A” by Wilbour received in the bequest from his daughter, Theodora Wilbour. Long, narrow strips (height 17.0 cm) resulting from a tight roll having been eaten through by insects. A few pieces join, but the majority do not. Some pieces are inscribed on both sides in different hands. One part of the text appears to be a business arrangement; the phrase *hrw 30 m-di n3 hrd.w* “30 days belonging to (or “with”) the children” occurs a number of times. Another part is in narrow columns in the manner of an inventory or account.

49. PAPYRUS

<i>Museum Number:</i>	47.218.60	<i>Illustration:</i>	—
<i>Provenience:</i>	—	<i>Date:</i>	—
<i>Dimensions:</i>	—		

DESCRIPTION

Thirty very small fragments, some bearing apparently an early Demotic script and one a half-dozen hieratic signs. Several show no writing on either side; five show evidence of writing on both sides.

50. PAPYRUS

<i>Museum Number:</i>	47.218.105	<i>Illustration:</i>	—
<i>Provenience:</i>	—	<i>Date:</i>	—

DESCRIPTION

Numerous fragments deriving from several different Demotic documents, for the most part apparently accounts, removed from a box marked “47.218.130.” Personal names occur similar to those on the fragments under cat. nos. 44, 45, and 54.

54. PAPYRUS*Museum Number:* 47.218.131*Illustration:* —*Provenience:* Elephantine(?)*Date:* —*Dimensions:* —

DESCRIPTION

Fragments from at least two different Demotic documents. One fragment is inscribed on both sides. A few pieces have been joined with others. The texts appear to be accounts consisting of personal names followed by numerals. Names occur similar to those on the fragments under cat. nos. 44, 45, and 53.

55. PAPYRUS*Museum Number:* 47.218.132-B*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* —

DESCRIPTION

Four small fragments inscribed with Demotic on one side only. The fragments were removed from a container marked “47.218.132” in which there were also numerous fragments inscribed in hieratic.

56. PAPYRUS*Museum Number:* 47.218.137*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* —

DESCRIPTION

Nine fragments, the largest of which bears Demotic on both sides in different hands. The other pieces bear hieratic on one side only; at least three of them are in the same hand.

OSTRACA (Cat. Nos. 57–204)**RECEIPTS (Cat. Nos. 57–118)****NECROPOLIS OVERSEER'S FEE (*ḥd mr ḥꜣs.t*) (Cat. Nos. 57–66)**

Note also cat. no. 14. For the only other receipt for the necropolis overseer's fee known to me besides the following ten in Brooklyn, see Wångstedt, "Steuerquittungen," 44–46, no. 18.

Cat. nos. 58–66, all showing internal relationships to each other, are here arranged in chronological order on the basis of the dates themselves. The reading of the dates of cat. nos. 59 and 61 shows the principal differences from Malinine's readings. Cat. no. 64 was written only nine days earlier than cat. no. 65. When the receipts are so ordered it can be seen that the same "undertaker," *Pn-nfr* son of *Pꜣ-di-Nfr-ḥtp*, paid the necropolis overseer's fee in years 15 to 19 (cat. nos. 58–60), while it was presumably his son, *Pꜣ-šr-nꜣ-ntr.w* son of *Pn-nfr*, who took over the post and paid the fee in years 21 to 26 (cat. nos. 61–66).

NOTES — *Brian P. Muhs*

^A Muhs suggests Year 15 (of Ptolemy II Philadelphus?). The suggested date is based on the reading of the tax name and the identity of the scribe.

^B Muhs suggests reading “the yoke(?) tax (*ḥḏ nḥb*).” The reading is supported by the identity of the scribe.

^C Muhs suggests reading the name as *Pn-ḥy*. For this scribe, see Vleeming, *Ostraka Varia*, p. 104.

^D Muhs suggests reading “day 28.”

DESCRIPTION

Dull brown with salt stains, fine texture, compact, and hard. Wilbour did not realize that the upper small piece (1557) joined the larger piece (1615) and numbered them separately. Karl-Th. Zauzich found that 1590 also joined these two pieces to complete the text. Despite the fact that the writing is generally legible, I cannot read crucial passages in the text or gather the importance of it.

DESCRIPTION

Exterior (inscribed) surface very dark gray-black and dark gray throughout the fracture. The text of this horoscope is apparently complete in twelve lines. If anything is lost, it was below line 12, which is so close to the edge as to be damaged. At various places the writing is so faded as to be problematic against the dark background. I am indebted to David E. Pingree for his assistance in making out the astronomical possibilities that guided me in reading the difficult text.

^a The *hrw(?)* “day” is written just like the *tpy* at the beginning of lines 4 and 5.

^b Sw 1 “day 1” must be an error for sw 2 “day 2” because “The Birthday of Osiris” is the name of the first epagomenal day.

^c The sw 27 “day 27” is far over to the left, separated from lines 16 and 17 and therefore probably belongs to line 18.

DESCRIPTION

A small clay pot, rather crudely made, with a lip at the top and a projecting knob at the bottom. An inscription of two lines is written completely around the pot slightly below the lip and above the bulge of largest circumference. The text consists of a series of personal names beginning with “Horus” and continuing with an epithet of Horus or, more likely, the compounds indicate that the deity himself is intended each time with a different epithet, thus suggesting that the pot or its contents were a votive offering to Horus.

NOTES

^a Nothing was written above line 1. For a similar text, see Wängstedt, “Demotische Ostraka, Varia 2,” *Orientalia Suecana* 30 (1981): 9, no. 3, DO Wien 30.

^b The actual total of the “remainders” in lines 2 to 11 is 161 3/4. The scribe, in adding the numbers at the end of the lines, may have inadvertently included the numeral 1 of “day 11” and the plural article *n3* of “the remainders” at the end of the first line and the combination would have looked like 1 1/2 to make the total in line 12 come to 163 1/4.

NOTE

^a “The men of Pamonthes” further marks this ostrakon as from Thebes during the reign of Augustus; see Lichtheim, *Dem. Os. M. H.*, 16f. The five known cases of “the men of Pamonthes” are in tax receipts: *ibid.*, nos. 27, 52, and 98;

Gardiner, *Theban Os.*, D 16; and Wångstedt, *Ausgewählte dem. Os.*, no. 22. A list of men concluding with “completing the men of ... Imuthes(?)” is judged to be Ptolemaic by Wångstedt, “Aus der demotischen Ostrakonsammlung zu Uppsala, 4,” *Orientalia Suecana* 9 (1960): 73f., no. 12, fig. 3. All other occurrences of “men of PN” are in Theban receipts of the reign of Augustus; Mattha, *Dem. Os.*, nos. 25, 26, 28, 153, and 183; Lichtheim, *Dem. Os. M. H.*, nos. 19, 20, 21, 22, 25, 26, and 28; and Wångstedt, *Dem. Os. Zürich*, nos. 5 and 6.

DESCRIPTION

Light tan ware with dark reddish brown slip, fine texture, and heavily ribbed on the interior of the pot. The text is completely preserved in three columns of Demotic with a two-line heading above the first two columns, except for some surface damage in the middle of column II. Two Greek notations are in the midst of column III and eight in Greek at the bottom of the ostrakon. The Demotic heading is obscure even though reasonably well preserved. It may end thus: *ḥsb.t-sp 9 n ... (2) n Swn(?)*, “year 9 of ... (2) in Aswan(?)”

Column I consists of twenty-six personal names, a few of which are Egyptian. A line is drawn beneath the twentieth name and the numeral “20” written after it. Well below the column is the numeral “26,” the number of names in column I. Almost all the names are followed by marks consisting of Xs and vertical strokes thus: X, XI, XIX, or XX.

Column II consists of twenty-four spelled-out personal names(?), none of which are Egyptian or Greek, nor do they appear to be Semitic but may be Nubian. Following the twenty-third name is the numeral “24,” the total number of names in the column. All the names in the column are followed by X, XX, or what may be X sw 2 X “X, day 2, X.”

Column III consists of eleven names, a few of which are Egyptian and some of which are followed by an X. Between the seventh and eighth names are two lines of Greek of which I recognize only the numerals “52,” “2,” and “54.” Of the eight separate notations in Greek at the bottom I recognize only σκάφη “boat” and λιθοφόροι “stone carriers.” The sixth and seventh entries are followed by the numerals “29” and “27” flanked by symbols.

DESCRIPTION

Reddish brown slip on light tan ware, fracture light tan throughout, and rather fine texture. The text consists of the parts of nine lines, but the sherd is broken off on all sides except at the beginnings of lines 4–9. I can make out very little of the text. The feminine noun *bne.t* occurs five times; its determinative, when discernible, is the “silver” sign. In most of the contexts it appears to be a measure.

DESCRIPTION

Light tan except where stained, evenly fired throughout fracture, fine texture, and interior of pot blackened. The text consists of parts of twelve lines. The top and left side are broken off. Where readable the text appears to consist of feminine personal names only, sometimes two to a line. Lines 2, 3, 4, and 7 begin with the same name, which looks like *T³y-dw³-ntr*. Other recognizable names are *N³-nfr-šy*, *T³-šr.t-(n)-t³-i³b.t*, and *Tn.t-Hnm*.

DESCRIPTION

Surface dark brown, fracture dark gray throughout, fine, compact texture, and hard. The text consists of seventeen lines. The sherd is broken off at the top and on lower left side so that only lines x+5 through x+8 are complete. It would appear to be a list or account, each line being independent. Line x+6 (complete) may read *n ty sw 21* “from day 21.” Some lines appear to begin with a personal name, as for example line x+7: *Ty-dꜣdꜣ ... mdꜣ(?) 6*. Six lines end with *mdꜣ(?)* and a numeral. The *mdꜣ(?)* is a masculine noun. The name *Pn-Hnm* appears six times, four times initially and twice as a patronymic.

Dull light brown, fired from outside only, fracture light gray, and outer surface has flaked off extensively. The text is apparently complete in five lines, but it is so largely flaked and rubbed off that I can make practically nothing of it.

Dull red surface which has a tendency to flake off and has modernly been pitted by a sharp instrument; fired deeply on outside, shallowly on inside; core of fracture gray. I can barely distinguish where five lines of text were but cannot read anything. Karl-Th. Zauzich notes “M. E. ein griechisches Ostrakon.”

Sandy brown on both surfaces, light gray in core of fracture, and fine, hard texture. The text consists of five lines in a large, bold script with apparently nothing broken off, but most of it is rubbed off leaving only traces.

202. OSTRACON*Museum Number:* 12768 1787*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* Max. height 9.0 cm; max. width 5.8 cm; thickness 0.8 cm**DESCRIPTION**

Light tan slip on obverse, fracture and interior of pot cream colored, and fine texture. The text consists of at least nine lines; apparently none are broken off, but it is almost completely illegible owing to the flaking of the slip.

203. OSTRACON*Museum Number:* 12768 1796*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* Max. height 6.2 cm; max. width 6.0 cm; thickness 0.7 cm**DESCRIPTION**

Text: Six lines very much rubbed and faded throughout. Beginning of the first line broken off. Text written exceptionally on the ribbed inside of the pot, not on the smooth exterior. Nothing is readable. Prof. Karl-Th. Zauzich notes, “Einige Zeichen sind doch wohl griechisch.”

204. OSTRACON*Museum Number:* 12768 1728*Illustration:* Plate 40d*Provenience:* —*Date:* —*Dimensions:* Max. height 9.5 cm; max. width 10.7 cm; max. thickness 0.9 cm**DESCRIPTION**

Dirty gray brown, fracture very light gray throughout, and somewhat porous in texture. The text is complete in six lines but badly faded, rubbed, and smudged.

ADDITIONAL TEXTS (CAT. NOS. 205–212)

The following ostraca (Cat. Nos. 205–210) and papyri (Cat. Nos. 211–212) were first seen by Karl-Th. Zauzich in the Brooklyn Museum in 1976. Working from photographs, I have simply added them as a group at the end of the catalog rather than inserting them into the categories into which the catalog is divided.

OSTRACA (Cat. Nos. 205–210)**205. OSTRACON***Museum Number:* 12768 1633*Illustration:* —*Provenience:* Thebes(?)*Date:* Roman(?)*Dimensions:* —**DESCRIPTION**

An account in thirteen short lines of text. Each line consists of a proper name, frequently without patronymic, followed by a sum of money ranging from one *kite* to three *staters*. A few lines consist of two names, each followed by a sum of money.

TEXT

A sample of the text:

DESCRIPTION

A receipt(?) in three and one-half lines of coarse, heavy script, most of which is so badly rubbed as to be nearly illegible. Only the season and day at the very end are well preserved. The reading is hesitantly suggested.

TEXT

DESCRIPTION

The text consists of only a few signs in a very heavy script, but apparently nothing is lost. The first line of the following reading is reasonably certain, but the second is highly dubious and is based largely on the accuracy of the first.

DESCRIPTION

The sherd has a slip. The piece is not quite a rectangle because the sides are not parallel like the top and bottom. The text is written on the slip. The inscription consists of only two or three signs in a heavy line, either at the top right or bottom left of the sherd depending upon how one holds it. If it is at the top right, as one would expect, I cannot suggest a reading; if it is at the lower left corner, it looks rather like the proper name *Hr-wdʿ*.

210. OSTRACON*Museum Number:* 12768 1801*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* —

DESCRIPTION

A very irregularly-shaped sherd with three ribs running across it toward the bottom. Perhaps fourteen lines of very coarse writing were originally across the width, but they are so badly rubbed, smudged, and stained that they are illegible to me at any point.

UNACCESSIONED PAPYRI (Cat. Nos. 211–212)**211. PAPYRUS***Museum Number:* Envelope C*Illustration:* —*Provenience:* —*Date:* —*Dimensions:* —

DESCRIPTION

The envelope contained dozens of papyrus fragments, some very small (negative L-959–14). Thirteen of the more promising pieces were isolated and photographed (negatives L-959–3, –7, –11). The script appeared to be good Ptolemaic in all cases, but the subject matter appears to vary widely.

TEXT

The largest fragment measures 8.0×4.5 cm and bears the mid-portion of six lines of text (below).

Another fragment bears the mere beginnings of four lines as follows:

NOTES

^a All but the initial letter is preserved.

^b Only the determinative, as in line x+3, is preserved.

DESCRIPTION

The envelope contained twenty-seven fragments, sixteen of which bear writing on both sides. The photographs bear negative nos. L-959–17, –20, –23, –29, –31, –35 (obverse) and L-958–3, –6, –9, –13, –15, –19 (reverse).

TEXT

One of the larger pieces (ca. 5.0×2.2 cm) bears bits of the middle of six lines. It is of interest because the text would appear to have been similar to the Hermopolis manual of case law because a couple of the most characteristic phrases to be found throughout that text are identifiable in this fragment (see, e.g., below); see G. Mattha, *The Demotic Legal Code of Hermopolis West* (Bibliothèque d'études 45 and 45/2; Cairo: Institut français d'archéologie orientale, 1975).

DESCRIPTION

Fifteen major, plus several minor, fragments from a single roll, or perhaps from two or more related rolls, currently mounted in five frames (labeled 37.1647E A–E). The obverse of all major fragments of 37.1647E were decorated with painted vignettes of standing divinities, all facing to the viewer's right with the exception of the figure of Ptah in B1, who stands in a kiosk and faces to the viewer's left. The papyri appear to have been cut up in modern times so that one vignette would appear on each papyrus fragment. In the fragments' present state, only B2 and B3 join. Most of the fragments, except the three fragments in Frame A, bear a collection of interrelated Demotic agricultural and other economic documents on their reverses. Traces of palimpsest suggest that similar documents were originally written on some or all of the obverses of the papyrus sheets. The paleography and economic data of the documents suggest the reign of Ptolemy II. The highest year date preserved in any of the texts is year 10. The vignettes are later than the documents, perhaps late Ptolemaic or even early Roman.
